APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit to change the point of diversion, place of use and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 40869 is issued subject to the terms and conditions imposed in said Permit 40869 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on August 10, 1999 at which time all rights herein granted shall revert to the right being changed by this temporary permit.

Any well drilled under this temporary permit shall be drilled in what has been described in the United States Geological Survey Water Supply Paper 2263 as the intermediate alluvial aquifer. In no instance shall the seal on this well be less than 100 feet below ground level.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.0446 cubic feet per second, but not to exceed 4.48 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before:

Proof of completion of work shall be filed before:

Application of water to beneficial use shall be filed on or before:

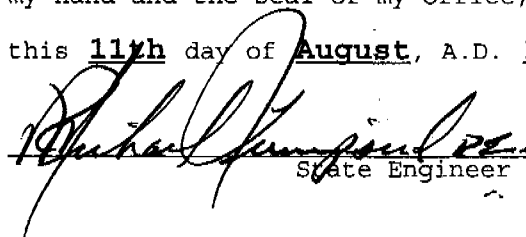

Proof of the application of water to beneficial use shall be filed on or before:

Map in support of proof of beneficial use shall be filed on or before:

IN TESTIMONY WHEREOF, I, R. MICHAEL TURNIPSEED, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office,

15. Remarks: This temporary application is made to address critical public safety fire protection needs of the community. It will provide commercial and domestic water to the Fallon/Churchill County Fire Department's fire sub-station and telecommunication sub-station. It is essential that this temporary water application is expeditiously approved for these public safety facilities such that the public health, safety and welfare are not jeopardized by lack of fire protection and emergency management communications for the community. Additionally the availability of this water at these public safety facilities is necessary to preserve and enhance the Fallon/Churchill County Fire Department's present Insurance Services Office (ISO) rating in this portion of the Fire Department's service area. This temporary application will be followed by a new permanent application to appropriate groundwater for these public safety facilities.
